AGRICULTURE

PROTECT THE HARVEST. STOP FIRES BEFORE THEY SPREAD.

Agricultural equipment operates in some of the most fire-prone environments. Dry crop residue, dust, and debris build up quickly on combines, harvesters, and tractors creating the perfect fuel source. When that material meets hot engine components or exhaust systems, fires can ignite in seconds.

The risk doesn't stop at the machine. In agriculture, a single fire can spread rapidly across fields, threatening entire harvests and putting operations at risk. Routine cleaning and maintenance help reduce exposure, but they can't eliminate it.

That's where purpose-built fire suppression systems come in, designed to detect and suppress fires quickly, limiting damage and helping protect both equipment and crops.

BUILT FOR THE DEMANDS OF AGRICULTURE

With over 50 years focused on heavy equipment fire protection, AFEX systems are built for the realities of agricultural work. Rugged, reliable, and field-serviceable, they help minimize downtime and keep operations moving - even in the toughest conditions.

EQUIPMENT WE PROTECT

- Combines & Harvesters
- Cotton Pickers & Strippers
- Tractors
- Balers
- Forage Harvesters
- Loaders & Telehandlers

AFEX
FIRE SUPPRESSION SYSTEMS

SYSTEM FEATURES

Stainless Steel Tubing Distribution

- Rugged construction
- Less costly and timely than replacing hoses
- Clean, organized appearance once installed for easy maintenance
- Virtually maintenance free

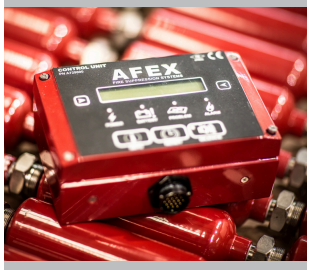
Conical Discharge Nozzle

- Broad distribution of dry chemical agent
- Total flooding to maximize coverage
- Spring-loaded hinges keep nozzles clear of debris
- Less maintenance than blow-off caps

Automatic Detection System

- Linear wire detects fire anywhere along length of cable
- Sensors activate automatically when they reach a preset temperature
- Manufactured to meet or exceed commercial, industrial and military specs

Control Unit



- Microprocessor technology with LCD display
- Audible and visual signals alert to problem or alarm conditions
- Internal log for troubleshooting
- Battery and stand-alone power

OUR EXPERTISE

AFEX knows heavy equipment and the hazards that put these vehicles at risk. AFEX distributors share the same special knowledge required to effectively protect heavy equipment against fire risks. Unlike our competitors' partners, all AFEX distributors are experienced in the fields of both vehicle fire suppression systems and heavy equipment.

When choosing a vehicle fire suppression system, choose AFEX for the quality of design and choose our distributors for the quality and reliability of their service.
